RESURFACING FAQ

SAVE MONEY

Our services provide a complete redo of your bathroom and kitchen including tiles counter-tops. Replacements can be very costly and you can save the money just by resurfacing.

Did You know, it takes only one tradesman and half a day to resurface a tub at counter top? Total replacement takes several days and three other tradesmen, not to mention the huge mess and noise. Even if you wanted a complete renovation of your bathroom or kitchen, it will take a minimum of 3 – 4 days instead of month.

AVOID STRESS

GO GREEN

Resurfacing allows you to recycle your old bathroom or counter -top. Our products are also environmentally friendly.

The high gloss finish is durable and easy to clean. Under normal use and care, resurfaced bathrooms and kitchens look great for nest 20 years or even more.

BE HAPPY

Vela Solis T/A Super Resurfacing, takes safety very seriously and each piece of our protective equipment was selected for superior performance and quality. We are protected at every level of the refinishing process with the proper air movement, type of cartridge or filter, and right size gear to meet physical needs. Our Safety Team, providing work safety information, training, instruction and supervision to our workers.

OUR MISSION IS TO PREVENT HAZARDOUS BUILD-UP

When spray painting, the parts per million build up in small rooms happens quickly. The exposure to the worker is compounded by tub & tile, kitchen cabinet jobs, etc., which extend the length of time needed to spray properly. The Fresh Air System completely take us out of the hazardous environment.

It is a well-known fact among professional refinishers that most imperfections in the finished surface are due to particles coming off the refinisher bending over the surface. The spray suits are lint-free and will drastically reduce dust. By producing a more perfect finish, related service calls are reduced.

We using the disposable, impact, and specialty gloves Protection of our hands and knees is an important part of being safe. According to the Safety Work NSW Statistics, injuries to the hand, wrist, and finger is the second-highest number of workplace injuries. Our hand safety products include disposable, reusable, latex, neoprene specialty gloves to protect our hands in refinishing tasks.

COUNTERTOPS RESURFACING

Don't Replace, Resurface & ReUse!! This Eco-Friendly Reduce & Reuse Process, a cost friendly option, allows you to save often as much as 75% over the cost of replacing with the look and luxurious feeling of a brand new surface!!

At Super Resurfacing we offer one of the most cost effective ways for our customers to restore their old, chipped, cracked, stained, dull our outdated countertops into like new again. Our countertop refinishing process involves applying a very strong and durable epoxy coating to your cultured Corian®, Formica® and laminate kitchen counters or bathroom vanities. This process is much more affordable when compared to the costs of having to completely replace the entire countertop.

Many of our Sydney clients also feel that the process of refinishing their countertops versus replacing them is a much more eco-friendly process since it allows them to simply reuse the materials that are already there. In many cases this allows them to take the cost of having to replace an entire countertop and apply it towards other renovations that they were hoping to do.

Our highly trained technicians can be at your home or business today to provide you with a quote for your project and in many cases can get started the same day. At Super Resurfacing our main focus is on customer satisfaction so rest assured you will be more than happy with the results. So whether you are looking for Corian® countertop refinishing, laminate, or ceramic tile refinishing in Sydney we've got you covered!

REGROUTING SERVICES

Regrouting services are offered through the professionals at Super Resurfacing. Showers and countertops that have tiled surfaces often develop missing, discoloured, or damaged grout.

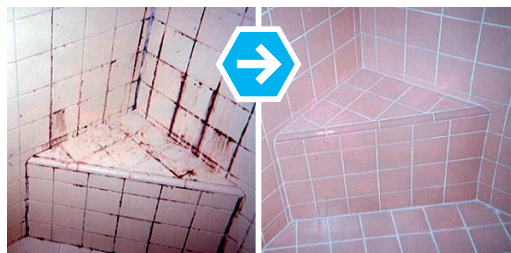

By regrouting the surface it can look brand new again. Super Resurfacing team will remove the old grout and replace it, giving the surface a new appearance that is elegant.

Not only will the surface look brand new, but there will be an extended life added to the surface, as well. After regrouting services are performed, you will be able to experience the room for a longer period of time because it is going to create a water tight area that can extend the life of the newly regouted areas for many years.

Health benefits also come with regrouting. By getting rid of all mould, dirt, mildew, and other substances, you are going to be avoiding what could turn into severe respiratory issues. You will also not need to use any harsh chemicals that you would typically use to get rid of difficult mould.

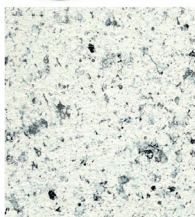

Instead of wasting time and money trying to re-tile the entire surface, regrouting services dramatically improve the appearance as if you had replaced the tile. By using professional tools, a technician will remove the grout from around the tiles and then will place new grout in between the tiles. You can regROUT your shower, bathroom, kitchen counters, floors, balconies, and fireplaces or anywhere else that has tile within your home.
